Ethan Borg

ethan.borg91@gmail.com | linkedin.com/in/ethan-borg | github.com/ethanborg91 | ethanborg91.github.io

Technical Skills

Languages: JavaScript, Java, Python, HTML, CSS, SQL

Developer Tools: GCP, Postman, Git, Jira, Agile, Linux, Docker, Datadog, Mailgun

Libraries/Frameworks: ReactJS, NextJS, SailsJS, NodeJS, MongoDB, PostgreSQL

Experience

Purchs **Jul 2024 - Present**

Full-Stack Software Engineer *Remote*

- Built a **B2B e-commerce** platform using **Next.js**, **Sails.js** and **MongoDB** designing **50+** secure **REST** endpoints while implementing role-based access controls to serve merchants and vendors across Ontario
- Developed product-management features including product upload, customer linking, and customizable fulfillment settings and launched a **CSV/XLSX** bulk-upload pipeline reducing vendor onboarding time by **60%**
- Implemented a **cron-driven scheduler** to automate **6** tasks including daily subscription checks, notification dispatches, and order submissions eliminating manual intervention and improving processing reliability
- Integrated **Stripe** for subscription billing and order payments (credit card, EFT), handling free trials and automated billing cycles in **Next.js** and **Sails.js**
- Provisioned and maintained **Google Cloud Compute Engine** VMs for both staging and production environments, ensuring zero downtime during deployments and meeting strict release schedules
- Enhanced and maintained an **SMS** ordering bot (**Plivo** + **OpenAI LLM**) to support UPC scanning, guided quantity entry, and location-aware context, cutting mobile order times by **50%**

Ivey Business School **Sep 2023 - Apr 2024**

Research Assistant *London, ON*

- Worked alongside Dr. Sergio Lazzarini, a multiple research award recipient, contributing and adding features to a software capstone project using **ReactJS**. A project aimed to optimize "Theory of Change" models, resulting in an **80%** reduction for theory evaluation

Projects

NHL 2025-26 Season Predictor | *Website* | *Source Code* **Flask | Scikit-Learn | NextJS**

- Created a web application using NHL data from the past 4 years to train a **Random Forest Classifier ML** model with interactive frontend sliders for start year and simulation seed, enabling varied team standings predictions
- Utilized **NextJS** for a responsive frontend, **Flask** for the backend **API** handling, data processing, and **ML** predictions, while being deployed on **Vercel** (frontend) and **Render** (backend) for seamless hosting

GitMetrics **NextJS | Python | PostgreSQL**

- Developed a **Git** analytics tool using a **Go CLI** to capture commit metadata and transmit **JSON** events to a **Python FastAPI** service, with all components (database, server, and frontend) running in **Docker** containers
- Designed the backend to validate events and store them in a **PostgreSQL** database, while a **Next.js** frontend dashboard visualizes the data and coding-session trends

Education

University of Western Ontario **Graduated: May 2024**

Honors Specialization in Computer Science *London, ON*

- **Courses:** Network Security, Operating Systems, Data Structures and Algorithms, Databases, OOP in C++
- Scholarship of Distinction, 2022-2024 Dean's Honor List, IBM Z Xplore Extended Badge
