Education

University of Western Ontario **Graduated May 2024**
Honours Specialization in Computer Science *London, ON*

- Scholarship of Distinction, 2022-2024 Dean's Honor List, Cisco Networking Basics
- **Courses:** Network Security, Operating Systems, Data Structures and Algorithms, Databases, OOP in C++

Work Experience

Connexxia **Dec 2025 – Present**
Full-Stack Software Engineer *Remote*

- Developed **CanadaGPT**, an AI-powered government accountability platform enabling complex queries on Canadian political data
- Built with **NextJS**, **GraphQL**, and **Neo4j**, modeling nodes and relationships between bills, MPs, and other political entities; implemented real-time data ingestion pipeline achieving **100%** bill data accuracy
- Enhanced chatbot functionality for more coherent and concise answers, and added a conversation sharing feature linking chat messages to the site's discussion board leading to an increase in user engagement by **20%**

Purchs **Jul 2024 – Nov 2025**
Full-Stack Software Engineer *Remote*

- Built a **B2B e-commerce** marketplace using **NextJS**, **SailsJS**, and **MongoDB**, enabling vendors to create products and merchants to place orders through **100+** secure **REST APIs**
- Integrated **Stripe** for subscription billing, free trials, and order payments with automated billing cycles via webhooks, reliably handling orders exceeding **$10,000**
- Deployed **Google Cloud Compute Engine** VMs for staging and production environments, ensuring zero-downtime deployments via **CI/CD** pipelines to meet scheduled releases and serve **280+ businesses** across Canada
- Enhanced **SMS** ordering bot using **Plivo** + **OpenAI LLM** to support UPC scanning, guided quantity entry, and location-aware context, reducing order times by **50%**

Ivey Business School **Sep 2023 - Apr 2024**
Research Assistant *London, ON*

- Developed a research project with **ReactJS** for Dr. Sergio Lazzarini to optimize "Theory of Change" business strategy models using directed graphs and a pruning algorithm, reducing evaluation time by **15+ minutes**

Projects

Home Lab **Proxmox | OpenMediaVault**

- Used a Dell PowerEdge R430 to self-host a server with many services. The server contains 4 drive bays that are currently filled with two 2TB HDDs that are used to store data and VMs
- Utilized Proxmox virtualization platform to create virtual machines and containers for services. The services that are currently online include a RAID1 configured NAS and a Minecraft server that is hosted online

NHL 2025-26 Season Predictor | *Website* | *Source Code* **Flask | Scikit-Learn | NextJS**

- Created a web app predicting NHL team standings using 4 years of data and a **Random Forest Classifier**. Handled backend API, and ML predictions with **Flask**, deployed on **Vercel** and **Render**

Technical Skills

Languages: JavaScript, TypeScript, Java, Python, HTML, CSS, SQL

Developer Tools: Google Cloud Platform, Postman, Git, Docker, Jira, Agile, Linux/Unix, Datadog, Mailgun

Libraries/Frameworks: ReactJS, NextJS, SailsJS, NodeJS, MongoDB, PostgreSQL
